[Qualitative Information/Financial Statements, etc]

1. Qualitative Information about consolidated operating results

At present the machine tool industry is still enjoying strong demand from customers in Japan, and demand from overseas customers has been increasing rapidly, especially in Europe and Asia.

This increased demand has resulted from the development of natural resources, overhauling of infrastructure, global automobile production, and most notably from the remarkable expansion of the aircraft industry. As mass production of aircraft gets into full swing, the need for a worldwide system of parts supply will be even more important.

Against this business environment, demand for Mori Seiki's lathes, machining centers and multi-axis machines is progressing smoothly. For the first quarter of this fiscal year, sales were 19.8% higher than for the same period last year, at 43.043 billion yen, and operating profit increased by 13.6% to 5.184 billion yen.

2. Qualitative Information about consolidated financial status

Total assets increased by 4.686 billion yen compared with the end of the previous fiscal year to 173.721 billion yen, and liabilities increased by 4.671 billion yen to 42.869 billion yen. Net assets increased by 16 million yen to 131.052 billion yen. These results mean that our shareholders' equity ratio has moved from 77.2% at the end of the previous fiscal year to 75.1%.

The main reasons for this increase in assets are that even though cash and deposits have decreased by 3.415 billion yen and notes receivable and accounts receivable by 3.386 billion yen, inventories increased by 8.386 billion yen and buildings and structures by 1.419 billion yen.

(Cash flow situation)

At the end of the first quarter the balance of cash and cash equivalents was 26.543 billion yen, down 4.042 billion yen from the end of the previous fiscal year.

"Cash flow generated by operating activities" decreased by 201 million yen as a result of net income for the quarter before tax adjustments, etc. of 6.21 billion yen, a 4.38 billion yen decline in accounts receivable, increase in inventories of 8.217 billion yen, an increase in income tax payments of 3.828 billion yen, etc.

"Cash flow generated by investment activities" decreased by 2.351 billion yen because of purchases of tangible fixed assets of 1.243 billion yen.

"Cash flow generated by financing activities" decreased by 1.768 billion yen because of dividend payments of 1.946 billion yen.

3. Qualitative information about consolidated earnings forecast

Our medium-term management plan, the Mori-568PLAN which is being implemented over the three years from FY 2006 to FY 2007, is progressing favorably in its third year, so there is no change to the consolidated earnings forecast published on May 7, 2007.

!! The earnings forecast is based on information available at the time of publication, but since it contains various uncertain factors, it is possible that the actual results may differ from those forecast.

4. Other

- (1) Important changes in subsidiary companies (changes of subsidiaries in the scope of consolidation) during the term.

There are no applicable matters.

- (2) Adoption of simpler accounting practices

Accounting standards for corporate taxes, etc . . . Calculated using the predicted full-year tax rate based on the legally effective tax rate.

Apart from these, we have adopted simplified procedures for some items which have very small impact.

- (3) Changes to accounting practices from recent consolidated fiscal years

There are no applicable matters.
